

# THE ULTIMATE SOLUTION IN OUTDOOR LIGHTING FOR HOTELS

## ATP, THE IDEAL CHOICE FOR OUTDOOR LIGHTING IN HOTELS

Imagine outdoor lighting of superior quality, with the latest LED technology for minimum consumption, requiring no maintenance, totally eliminating the risk of electrocution and with a wonderful aesthetic presence. Any hospitality establishment would like to have such equipment, and that is precisely what ATP, a world leader in the manufacture of high-quality street lighting and street furniture from engineered polymers, offers.

Thanks to our exclusively formulated materials, the products we create provide the definitive solution to the main problems of outdoor lighting: they are completely immune to corrosion and 100% insulating, making it impossible to be electrocuted when touching them. Added to this is the peace of mind that comes with a comprehensive 10-year warranty, the longest in the industry. With ATP, all you have to do is put the equipment in place and leave it to work. Install it and you're done.

### ◀ Hermetic and anti-electrocution light bollards

Our new hermetic and anti-electrocution light bollards are ideal for elegantly delimiting areas in the gardens and outdoor spaces of your hotel. They have been designed to offer maximum safety, with an attractive and compact appearance.

- Ambient lighting
- LED lighting
- Classic and modern  
style assemblies

Electrocution-proof  
outdoor lighting  
immune to  
corrosion

### The safest and most durable equipment

All our fixtures are made from ATP's unique polymeric materials, which are fully insulating, corrosion-immune, vandal-proof and recyclable. This includes our columns, arms and street furniture units.

### Tailor the assemblies to the style of your hotel

With our different combinations of bases, columns, arms and luminaires, and the wide range of colours available on request, you can perfectly match our assemblies and street furniture to the aesthetic needs of your facilities.

Control your hotel's  
outdoor lighting from any  
Bluetooth-enabled device

Our luminaires include an innovative remote control system that is easily operated from any smartphone or tablet with a Bluetooth connection. This technology works via an intuitive and user-friendly app and does not require a computer or computer server. Fast, direct and uncomplicated.

The system allows us to remotely control any fixture, either individually or by group. The luminaires can be switched on and off at any time and their luminous flux can be regulated. The possibility of adapting the use of the lighting to specific needs at different times ensures tight energy consumption.

This technology allows us to configure our luminaires as we wish, and to combine their operation as desired. It can also save scenes that we have designed for special events or specific lighting requirements.

# The big problems of outdoor lighting are now history

## Maximum safety

Our assemblies are manufactured with fully insulating materials. There is no risk of electrocution when coming into contact with the column or luminaire, which is impossible to ensure with any other product on the market.

## Minimal maintenance

ATP materials are immune to corrosion, hermetic (IP66+) and exceptionally resistant (IK10+). Thanks to these features, our products are maintenance-free and offer huge savings in the long term.

## Comprehensive warranty

Our 10-year warranty is the longest in the industry. Enjoy the peace of mind offered by a company that manufactures everything in Spain and has been offering its customers the best service with personalised attention for over 50 years.
